ProChip Chippers

✓ Made in Australia!

✓ Designed for the Hire Industry

Outstanding Performance, Reliability, Safety and Service

NOW AVAILABLE from Rayco Equipment Pty Ltd!

The Pro Chip 100 chipper is a reliable, compact unit perfect for hire shops, landscape contractors, farms and small tree crews. Powered by a 13.5hp Subaru engine, the Pro Chip 100 will easily handle brushy material, wood off-cuts and other vegetation material up to 100mm (4 inches). Due to its compact design, the Pro Chip 100 is light and easy to move around. It will enter confined spaces without difficulty and the 360-degree rotating chute allows the operator to change the discharge direction in seconds. Designed by arborists who use these type of machines, the Pro Chip 100 is a disc-type chipper that gets the job done. The self-feeding cutting action makes work a breeze while the belt-drive operation provides smooth running throughout. As productivity was a major factor with the designers, the machine was manufactured with easy access to the knives for quick servicing and less down time.

The ProChip 100 is powered by a 9.9kW/13.5hp Petrol Subaru Robin EH41 which comes with a 3 year warranty.

Designed for the Hire Industry, the ProChip 100 is a reliable unit that will easily tackle material up to 100mm.
